linkdin: Aida Nasuha | LinkedIn

Address: Lot 690b kampung pantai
pulau kundor 15350 kota
baru kelantan
Internship 6 Months (20 September
Availability: 2026 – 19 March 2027)

TECHNICAL SKILLS

- Networking: Network Architecture | TCP/IP | VLAN Management | Subnetting | Routing & Switching | Troubleshooting
- Cybersecurity: Network Security | Digital Forensics | Windows Forensics | Packet & Traffic Analysis
- Data Science & Web: Machine Learning (Naive Bayes) | NLP | Data Curation | Full-Stack Web Dev
- Programming: Python • Java • C++ • PHP • Bash • HTML • CSS • JavaScript • SQL

TOOLS

- Security & Network: Cisco Packet Tracer • Wireshark • Nmap • Metasploit • Nessus • Snort (IDS)
- IoT & OS: IoT (ESP8266/ESP32) • Arduino IDE • Linux (Kali, Ubuntu) • Windows Server
- Platforms & DB: Git • GitHub • Kaggle • MySQL • XAMPP

Language

Malay(Native)
English(fluent)

PROFILE SUMMARY

Final-year Computer Network Security student with a strong interest in cybersecurity, digital forensics, and secure network infrastructure. Experienced in developing practical security and machine learning solutions through academic projects. Seeking a 6-month internship opportunity to apply hands-on technical skills and grow within the cybersecurity industry.

EDUCATION

Universiti Sultan Zainal Abidin (UniSZA)

- Bachelor of Computer Science (Network Security) with Honors
- Current CGPA: 3.15 | Achievement: Dean's List (Semester 3, October 2023)

Sijil Tinggi Persekolahan Malaysia (STPM)

- Current CGPA: 2.84

ACADEMIC PROJECTS

Phishing Email Detection using Machine Learning | Oct 2025 – Present

- Developed an automated system to detect malicious phishing emails using the Naive Bayes algorithm.
- Pre-processed large datasets using NLP techniques (tokenization and stop-word removal) to extract suspicious URLs and keywords.
- Outcome: Successfully achieved high-precision filtering to mitigate credential theft and social engineering threats.

Smart Bed Exit Alert System for Patients (IoT Project) | Recent

- Designed and developed an IoT-based patient safety monitoring system to prevent fall injuries in healthcare environments.
- Integrated an ESP8266/ESP32 micro-controller with ultrasonic/pressure sensors and an I2C LCD display for real-time tracking.
- Outcome: Programmed low-latency visual and buzzer alerts to immediately notify caregivers upon unauthorized bed exit.

CERTIFICATIONS & BADGES

- Networking Basics – Cisco Networking Academy (Completed: July 2026)[cite: 2]
- Credential ID: 590473fa-d117-4dd2-b72e-beed09217758[cite: 2] | Validated core routing, switching, and protocol skills[cite: 2].
- Kaggle Certified Competency Badges – Kaggle Community (Earned: 2026)
- Python Coder & Dataset Tagger: Certified scripting efficiency and data classification.
- Dataset Creator & Documenter: Curated high-quality, open-source collaborative datasets.

WORK & LEADERSHIP EXPERIENCE& BADGES

Part-time Sales Promoter | Polo Hill, Pantai Timur Shopping Center | April 2025 – May 2025

- Handled customer inquiries and conflict resolution while maintaining strictly compliant transaction procedures.

Vice Chairperson – Sispa "Santunan Kasih" (UniSZA) | 2024

- Co-led a high-pressure community project, managing event logistics and coordinating volunteer-to-participant communications.
